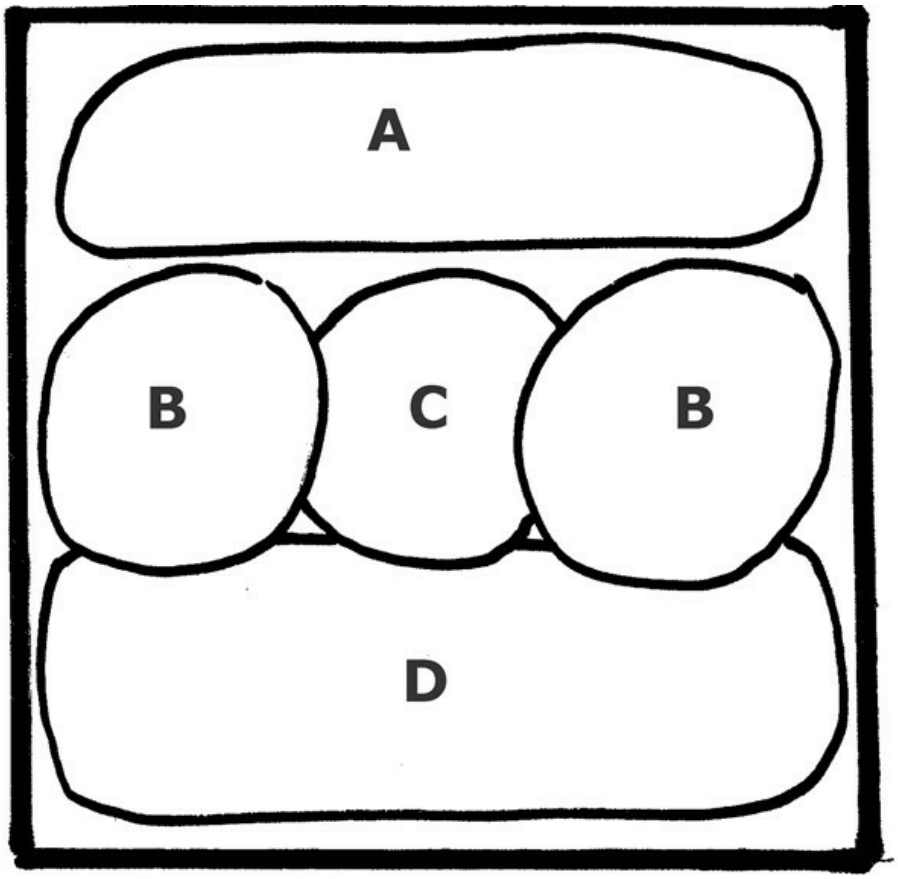
Layout 30 (27 L)



by Tropica

George Farmer has designed and maintained the Cube from Pets at Home. The layout is suitable for newcomers to the hobby. Chosen plants are easy and don't require CO2 injection to grow and thrive. Rotala is easy, compact and here the color is fresh green. Rotala can become redder having more light. Quadricostatus adds to the green aquarium and in front, the Ranunculus umbrellas make shapes and structure. There are many plants in relation to the volume of water which ensures that the aquarium is in balance and provides less risk of algae. The growth of the plants is slowly and keeps the aquarium low maintenance.

Tip! Cubes are small and can be placed almost everywhere at home. They are suitable for small fish and/or shrimps - however, be careful not to add too many!

Technique

Aquarium:	PETS AT HOMECUBE
Volume:	27 L
Light:	11W PC T5
Substrate:	Tropica Substrate
Gravel:	Fine gravel
Filter:	Internal 270 lph
CO2:	0
Fertiliser (weekly):	Premium Fertiliser 7 ml
Maintenance (hours per week):	<½

Plants used in this layout

A)	Rotala rotundifolia	(033)	2 pcs.
B)	Helanthium bolivianum 'Quadricostatus'	(068)	2 pcs.
C)	Anubias barteri var. nana	(101 YLS)	1 pcs.
D)		()	2 pcs.
D)	Ranunculus inundatus	(022C TC)	1 pcs.
