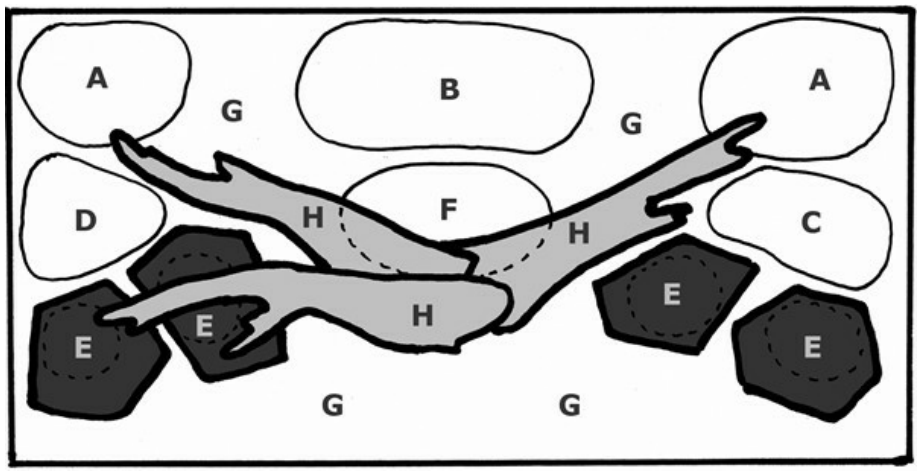
Layout 2 (128 L)



by Tropica

An example of an aquarium that will fit in several settings: The living room, the kitchen or in your office. This layout is classic because of its island composition. The foreground is a thriving carpet of Lilaeopsis and the colorful 'Rosanervig' is the focal point of the aquarium. By planting Anubias and Cryptocoryne in the middle of the aquarium will create a contrast of dark green to the bright green carpet and the colorful 'Rosanervig'. Java moss attached to wood will create both depth and maturity. The composition of plants provides a fine balance between fast growing plants (they take up nutrient and reduce algae growth) and slow growing plants that require less maintaining.

TIP! 'Rosanervig' is an undemanding plant. Nesaea crassicaulis or Rotala rotundifolia are suitable alternatives as easy and coloured plants.
