

# Layout 15 (112 L)

The aquarium in the children's room with the ship wreck, a diver, skeleton and lost treasures - the possibilities are many when choosing decorations! And it is easy to find plants which can help to represent the picture and create the necessary balance in the aquarium. We have chosen Egeria and Vallisneria which both can represent seaweeds. Algae balls are placed randomly as tufts on the coral reef, and Monosolenium are very much like Sea salad which you often find along the beach at summertime. All chosen plants are easy and do well even at the low light conditions as the chosen aquarium offer the plants!

**Tip!** The Bala shark (*Pangasios*) is a short-term choice for this layout, as it becomes too big for the aquarium over time. Please also add algae eating fish and inverts i.e. *Otocinclus affinis* and Cherry shrimp.

## Technique

Aquarium:	EHEIM
Volume:	112 L
Light:	T8 2 x 15W
Gravel:	Silica sand 0.8-1.2 mm
Filter:	Vita Tech 8.3 L/min
CO2:	0
Fertiliser (weekly):	10 ml Premium Fertiliser + 30 ml Specialised
Maintenance (hours per week):	<1/2

## Plants used in this layout

A)	Egeria densa	(058 BDT)	3 pcs.
B)		( )	2 pcs.
C)	Aegagropila linnaei	(000C ST)	5 pcs.
D)	Vallisneria americana 'Asiatica'	(056A BDT)	2 pcs.
E)	Vallisneria americana 'Natans'	(055 BDT)	2 pcs.
