

by Mark Evans

Mark Evans has aquascaped this "Iwagumi" layout. First, Mark arranges the fresh green, a shallow and vital foreground carpet. Between Hemianthus and the dark rocks there are tufts of Ranunculus. Behind the rocks there are light draperies of Rotala and on the side, where the rocks penetrate the sand, tufts of Eleocharis. Mark has attached blue foil to the aquarium and with light effects during photoshoots he achieves a blue sky over the fresh green layout.

**Tip!** Mark's layout is a good example of an aquarium where a few plant species give the impression of a pure style aquarium.

## Technique

Aquarium:	GLASS TANK
Volume:	60 L
Light:	1 x 150W
Gravel:	Ada powersand + Ada aqua soil
Filter:	1200 lph
CO2:	25 mg/L
Fertiliser (weekly):	Premium Fertiliser 70 ml
Maintenance (hours per week):	½-1

## Plants used in this layout

A)	Eleocharis parvula	(132C)	1 pcs.
B)	Rotala rotundifolia	(033)	1 pcs.
C)		( )	1 pcs.
C)	Ranunculus inundatus	(022C TC)	1 pcs.
D)	Hemianthus callitrichoides 'Cuba'	(048B)	1 pcs.
