

by Mark Evans

Soft curves of erectus, Staurogyne and Heteranthera cling around large lava blocks. Hemianthus Cuba, Eleocharis and Marsilea create horizontal, calm surfaces, while focus areas of macrandra and Alternanthera create attention. All plants are from the 1-2-Grow! series. Directly from the laboratory in small, sterile cups without any algae, snails or pesticides. The numerous growth areas on the 1-2-Grow plants make them significantly more dense and compact. Rotala macrandra and Rotala 'Bonsai' are only represented in the 1-2-Grow programme and are unique and quite an eye catcher in this layout.

**Tip!** Moss from 1-2-Grow! is naturally also free from algae, snails and pesticides, and besides avoiding the growth of algae from moss, the moss from 1-2-Grow! is particularly suitable for aquariums with e.g. shrimps or other sensitive residents.

## Technique

Aquarium:	IHM MÜLLER
Volume:	225 L
Light:	T5 Daylight 4 x 80W
Gravel:	Grain size 0.8-1.2 mm, light grey
Filter:	Built-in filter back wall w/ 2 Eheim pumps 600 l/h
CO2:	25 mg/L
Fertiliser (weekly):	100 ml Premium Fertiliser + 150 ml Specialised
Maintenance (hours per week):	1-2

## Plants used in this layout

A)	Rotala macrandra	(032 TC)	1 pcs.
B)	Pogostemon erectus	(053F)	2 pcs.
C)	Staurogyne repens	(049G)	3 pcs.
D)	Eleocharis acicularis 'Mini'	(132B TC)	2 pcs.
E)	Rotala indica 'Bonsai'	(033E TC)	1 pcs.
F)	Marsilea hirsuta	(010 TC)	2 pcs.
G)	Hemianthus callitrichoides 'Cuba'	(048B)	4 pcs.
H)	Vesicularia ferriei 'Weeping'	(003B POR)	1 pcs.
I)	Vesicularia montagnei 'Christmas'	(003A POR)	1 pcs.
J)	Alternanthera reineckii 'Mini'	(023C TC)	2 pcs.
K)	Heteranthera zosterifolia	(096 TC)	1 pcs.
