

by Tropica

A world of 1-2-Grow! All variants are represented in this aquarium. The three tallest plants - Nymphoides, Rotala and Heteranthera - show up behind a mountain range of red granite. In between the large rocks, the moss is wedged and creates deep green glaciers. The clear, light green Riccia is tied to a couple of lava stones furthest to the left. Pogostemon and Staurogyne are accentuated in their leaf form as well as colour by Alternanthera, which together with Rotala creates focus areas. Eleocharis, moss, Hemianthus and Marselia, together with Glossostigma and Lillaeopsis, create a vigorous and varied plain landscape, where the little, compact Rotala 'Bonsai' shoots up here and there. A more harmonious and calm layout can be achieved by using a smaller amount of different foreground plants.

**Tip!** 1-2-Grow plants are smaller than normal pots by the planting and must have time to grow. It is therefore important to fertilize in small doses already from the beginning and gradually increase the dose in line with the growing plant mass.

## Technique

Aquarium:	IHM MÜLLER
Volume:	270 L
Light:	T5 Daylight 4 x 54W
Gravel:	Grain size 0.8-1.2 mm, light grey
Filter:	Eheim Professionel 2
CO2:	25 mg/L
Fertiliser (weekly):	100 ml Premium Fertiliser + 150 ml Specialised
Maintenance (hours per week):	1-2

## Plants used in this layout

A)	Nymphoides hydrophylla 'Taiwan'	(041B)	1 pcs.
B)	Rotala macrandra	(032 TC)	1 pcs.
C)	Heteranthera zosterifolia	(096 TC)	1 pcs.
D)	Alternanthera reineckii 'Mini'	(023C TC)	2 pcs.
E)	Staurogyne repens	(049G)	2 pcs.
F)	Riccia fluitans	(001 TC)	1 pcs.
G)	Vesicularia montagnei 'Christmas'	(003A TC)	2 pcs.
H)	Eleocharis acicularis 'Mini'	(132B TC)	2 pcs.
I)	Pogostemon erectus	(053F TC)	2 pcs.
J)	Rotala indica 'Bonsai'	(033E TC)	3 pcs.
K)	Vesicularia ferriei 'Weeping'	(003B TC)	2 pcs.
L)	Glossostigma elatinooides	(045A TC)	2 pcs.
M)	Hemianthus callitrichoides 'Cuba'	(048B TC)	2 pcs.
N)	Marsilea hirsuta	(010 TC)	2 pcs.
O)	Lillaeopsis brasiliensis	(040 TC)	2 pcs.
