

by Tropica

Diversity and vigour makes an aquarium exciting, but requires experience and a lot of maintenance. The shape of the leaves, colours and sizes have been thoroughly mixed in order to create life and diversity. Just as in nature, the plants are fighting for space and light. The strongest and fastest growing plants must be cut often to prevent them from suffocating the weaker plants. Obviously, ground covering plants must not be shaded, so it is important to thin out the floating plants intensively on a regular basis.

**Tip!** "Jungle"-style mixes a lot of different plants, but takes a great deal of practice. The result can easily get very messy.

## Technique

Aquarium:	IHM MÜLLER
Volume:	300 L
Light:	T5 Daylight 4 x 54W
Gravel:	Rådasand 1.2-2.0 mm
Filter:	2x Eheim pump 600 L/h
CO2:	25 mg/L
Fertiliser (weekly):	Premium Fertiliser 100 mL + 125 mL Specialised
Maintenance (hours per week):	1-2

## Plants used in this layout

A)	Anubias barteri var. nana	(101 YWS)	1 pcs.
B)	Anubias barteri var. caladiifolia	(101U)	1 pcs.
C)		( )	3 pcs.
D)	Echinodorus 'Ozelot'	(073F)	2 pcs.
D)	Myriophyllum mattogrossense	(037)	2 pcs.
E)		( )	2 pcs.
E)	Pogostemon stellatus	(053G)	2 pcs.
F)		( )	1 pcs.
G)	Nymphaea lotus	(019)	2 pcs.
H)	Micranthemum glomeratum	(048A)	2 pcs.
I)	Pogostemon deccanensis	(053F)	3 pcs.
J)	Hygrophila lancea 'Araguaia'	(051B TC)	5 pcs.
J)	Pogostemon helferi	(053H)	5 pcs.
K)	Lilaeopsis brasiliensis	(040)	8 pcs.
L)	Micranthemum callitrichoides 'Cuba'	(048B)	5 pcs.
M)	Microsorium pteropus	(008 YWS)	1 pcs.
N+)	Vesicularia montagnei 'Christmas Moss'	(003A POR)	2 pcs.
P)		( )	1 pcs.
