

by Adrie Baumann

Twelve different plants live in this aquarium, growing under the water surface, on tree roots and stones. The large hardscape in the middle, consisting of driftwood and mini landscape, is a vital part of the aquarium layout. On the journey through the aquarium, the viewer will continue to discover new things, e. g. small prawns, peeking out here and there from plant thickets or the hardscape. Since most of the plants also grow quickly, this will add constant change to the aquascape, which will never seem boring to the viewer.

Tip! All the different kinds of plants require time and knowledge about maintenance.

Technique

Volume:	182 L
Light:	2 x 30W LED
Gravel:	Fluval Stratum
Filter:	Ext. JBL Cris.Pro GL e 90 or GL e 901
CO2:	2 bubbles per second
Fertiliser (weekly):	Specialised Fertiliser 35 ml
Maintenance (hours per week):	½-1

Plants used in this layout

A)	()	5 pcs.
A)	()	10 pcs.
A)	()	8 pcs.
A)	Rotala wallichii (032A TC)	5 pcs.
B)	Eleocharis parvula (132C)	10 pcs.
C)	Anubias barteri 'Petite' (101H)	5 pcs.
D)	()	3 pcs.
D)	Ranunculus inundatus (022C TC)	1 pcs.
E)	Hygrophila pinnatifida (051A)	3 pcs.
