

by Tropica

The light distribution is extremely centred in this oblong aquarium, which results in quite shady corners.

*Alternanthera 'Mini'* is placed in the middle, in order to achieve optimal colour under the best light.

Light green *Pogostemon erectus* and *Hygrophila 'Rosanervig'* with pink streaks grow behind the mangrove root. In front, *Eleocharis 'Mini'* and *Staurogyne* create tight, low areas of vegetation.

All plants are from the 1-2-Grow! Series, except for *Hygrophila 'Rosanervig'*.

## Technique

Aquarium:	SUPERFISHHOME 25
Volume:	25 L
Light:	LED 3200 lux
Gravel:	Flora Base brown, large pellet
Filter:	Superfish Aquaflow 100
CO2:	Tropica System Nano
Fertiliser (weekly):	Specialised Fertiliser 5 ml
Maintenance (hours per week):	<math>\frac{1}{2}</math>
